ORIGIN OF THE PROJECT

Athletic

since my youngest age, I wanted to bring together my friends, my family and my colleagues to a great sportive and humanitarian challenge in 2014.

The idea

of creating this sportive and humanitarian challenge came to me in 2013 during my universitarian year in the United States where each student event has a very strong solidarity connotation.

Solidarity

is the DNA Peak of Dreams since its creation in 2014, since I chose to realize my challenges for the dreams of seriously ill children and teens.
